more of the branded
green?

■ Profile

I'm a structural and remedial engineer with more than a decade on Australian building sites, and the director of XNDR Consulting. My work runs from designing new structures — car parks, schools, apartment buildings — to working out why the ones already standing are failing and putting them right. Today I lead a team across New South Wales, working shoulder to shoulder with owners, strata committees and builders to see each job through.

10+

Years across design and site

Registered practitioner

EDUCATION

Master of Engineering (Structural)

The University of Melbourne, 2015

Bachelor of Engineering (Civil), Honours

The University of Melbourne, 2013

Concrete, steel and timber design (AS 3600, HB 48, AS 1170) and structural analysis

REGISTRATIONS & CREDENTIALS

Registered Professional Engineer — DBP

PRE0002167

Registered Design Practitioner — DBP

DEP0003540

Member, Engineers Australia (MIEAust)

■ Core Strengths

ENGINEERING

- Remedial engineering & defect diagnosis
- Structural design — concrete, steel & timber
- Post-tensioned & reinforced concrete
- Structural inspection & condition assessment
- Waterproofing, concrete & façade repair
- Corrosion protection & re-strengthening

DELIVERY & LEADERSHIP

- Leading and mentoring engineering teams
- Tender & construction-phase management
- Contract administration, variations & EOTs
- Stakeholder management — owners, strata, trades
- Program, budget & fee control
- Design modelling & calculation checking

■ Experience

XNDR Consulting · Sydney

Present

Director

As Director of Structural and Remedial Engineering at XNDR, my core focus is solving complex building issues—figuring out why a structure is failing, designing the fix, and seeing the project through to handover. I work side-by-side with owners, strata managers, and trades from first inspection through tender and construction. Our work covers everything from concrete spalling, waterproofing, and corrosion protection to façade remediation and structural re-strengthening.

Remedial

Structural

Project management

Partridge Engineers, Sydney
(2024-2026)

Associate/Team Leader – Senior
Remedial Engineer

2022 – 2024

CORE Consulting · Sydney

Team Leader · Senior Remedial Engineer

Led a remedial team across residential and commercial buildings around Sydney, from both the contractor and client side. Investigated defects, designed and documented the repairs, ran the tenders, and oversaw the works on site through to completion — managing a team of five engineers and drafters.

Strata

Contractor & client side

Team of five

SCP Consulting · Sydney

Structural Design Engineer

2021 → 2012 – 2022

Designed and delivered structures on major education and mixed-use projects, from concept through to construction — checking conventional and post-tensioned reinforcement on site, holding workmanship to standard, and resolving engineering issues as they came up.

Concept to construction

PT & reinforced concrete

Cardno · St Leonards, Sydney

Site / Structural Engineer

2014 → 2015 – 2021

Delivered large public infrastructure — multi-level car parks and station upgrades — as both designer and site engineer, taking work from concept and tender through peer review and construction, and managing variations, extensions of time and billing along the way.

Winner — Cardno APAC Safety Award, 2020

Nominated — Future Leader of the Year, 2020

Nominated — ACSE Young Engineer of the Year, 2019

Infrastructure

Design & site

Selected Projects

STRUCTURAL & INFRASTRUCTURE

Warrick Lane Precinct Redevelopment

Blacktown, NSW

Four-level underground car park · ~485 spaces · rooftop park · two flanking buildings

A four-level underground car park for around 485 vehicles, with a central park sitting on the car-park roof slab and three-storey buildings flanking each side.

MY PART Designed the structure from concept to tender · Principal engineer / peer review for the client through construction · Variations, extensions of time and billing

Rooty Hill Car Park & Station Upgrade

Rooty Hill, NSW

Six-storey car park · ~750 spaces · pedestrian links both sides of the station

A six-storey car park for around 750 vehicles, with upgraded pedestrian links to both sides of the station.

MY PART Design and construction management · Managed principal contractors on site · Held the budget, ran variations and RFIs

Cranbrook School Redevelopment

Bellevue Hill, NSW

Aquatic & fitness centre (50 m pool) · theatre · assembly hall · chapel · 11 classrooms

A major school redevelopment: a new aquatic and fitness centre with a 50 m pool, a theatre and performance rooms, an assembly hall, dining, a chapel and eleven new classrooms.

MY PART Design and construction management · Inspection of conventional and post-tensioned reinforcement · On-site engineering support and RFIs

St Elias Church

Guildford, NSW

Two-level church over a four-tier underground car park · conventional slab & beam

A two-level Catholic church built over a four-tier underground car park, in conventionally reinforced slab and beam.

MY PART Design and construction management · Workmanship and specification compliance · Budget, variations and RFIs

5 Skyline Place

Frenchs Forest, NSW

Five-storey mixed-use apartments · cafés, medical & retail · two basement levels

Five storeys of mixed-use apartments over cafés, medical suites and retail, with two levels of underground parking.

MY PART Design and construction management · Reinforcement and post-tensioning inspection · Workmanship checks and RFIs

Selected Projects

REMEDIAL & STRUCTURAL REPAIR

Across NSW strata and commercial buildings: waterproofing, spalling and concrete repair, façade works, blast and paint, corrosion protection and structural re-strengthening — carried from the first inspection through tender and into construction.

Sydney Harbour Bridge

STRUCTURAL INSPECTION

Structural inspection and condition assessment on one of the country's most recognisable structures.

Heart of Willoughby

COMMERCIAL · WILLOUGHBY, NSW

Remedial and structural repair works on a prominent commercial building, from investigation through construction.

RESIDENTIAL

- 67 Ocean Street, Woollahra
- 60 Walker Street, Rhodes
- 49 Spencer Street, Rose Bay
